RAGHUL R

SOFTWARE ENGINEER

raghul2297@gmail.com | 9003466085

SUMMARY

Software Engineer with four years plus of experience in designing, developing, and maintaining robust software applications. Proficient on writing clean, scalable and efficient code. Experienced in working with modern development frameworks, version control systems, and agile methodologies to deliver high-quality software solutions on time. Adapt at collaborating with cross-functional teams to identify requirements, troubleshoot issues, and implement improvements.

TECHNICAL SKILLS

- **.NET Technologies** : C#, ASP.NET Core, MVC, Web API, Entity Framework, DotVVM, MVVM, ADO.NET, LINQ, ASP.NET Core WEB API, .NET 6.
- **Front-End Technologies :** Html, Css, JavaScript, Angular.
- **RDMS** : MS SQL Server, MYSQL.
- **Cloud** : AWS EC2, Web Deploy
- **Methodology** : Agile
- **IDE** : VS Code, Visual Studio.

CERTIFICATIONS

- Mendix developer Rapid and Intermediate Certificates.

- Dot Net Course Certification.

EXPERIENCE

Software Engineer
DataWens Technologies   **April 2025 - July 2025**

- Developed web application modules for the Patient and Doctor using Dotvvm for UI and Backend implementations and MYSQL for the database end.

- Implemented multiple reports and excel export functionalities for the easy way of accessing patient details through the application itself.

Software Engineer

Rapid Data Technologies   **June 2022 - April 2025**

- Lead the design and development of Restful API using .Net Core, resulting in high-performance API integrated with SQL databases.
- Troubleshoot and resolve API issues, optimizing performance to meet project requirements.
- Collaborated with UI development teams, ensuring dynamic DOM operations of multiple projects with project specifications.
- Contributed to .Net Core API development and core debugging activities.
- Applied expertise in continuous integration and continuous delivery methodologies.

Dot Net Developer

MSC Technology Pvt Ltd   **August 2020 - February 2022**

- Troubleshoot and resolve issues and queries which has been raised by the real time customer issues which are faced through the application.
- One Vision Agency application ensures the shipment process and handling of real time data which are automatically tracked from end to end and provide appropriate customer satisfaction and ensure that there is no data misled or leaked through the entire process of the shipments which are done by the customer end.

EDUCATION

- Master of Computer Applications   **April 2020**
- Bachelor of Computer Applications   **April 2017**

PROJECTS

DOCTOR 24BY7 - EMR Application   **April 2025 - July 2025**

- Doctor 24By7 is an EMR Application which is being developed and designed in mobile as well as in web based format.

- The main functionality of this application is to automate the patient records and the appointment details which has been done by the patient to the specified doctor or consultant.

- Multiple reports have been handled for the doctor and the patient wise also to track their details accordingly in an easy way.

- Every patient and the doctor are able to interact with their respective patients and doctors through whatsapp video call and google meet regarding their clarifications of diagnosis which has been gone through the medical time period.

RAPID HR - HRMS Application   **June 2022 - April 2025**

HRMS Applications is being designed and developed to automate the organization works and the employees directory and the confidential information in a single way of access. It is being developed for the ease of usage for the HR departments and the higher management levels.

Responsibilities & Contributions

- Designed and developed several modules from the employee end such as Comp Off Requests, Asset Requests, Help Desk, Announcements, Events (i.e. Birthdays and Work Anniversaries), Asset Repair Requests, Asset Shipments.
- Developed modules for the approval process for the request which is being done by the employee based on the workflow approval steps which is being configured.

- Implemented Push Notifications and Inline Notifications using SignalR for all efficient data synchronization and server-client interactions for all the requests and approvals which are being done.
- Integrated Scheduler services for birthday and work anniversaries notifications through email for all the employees.
- Deployed web application through UAT and the production environment.
- Designed a query structure to reduce the code complexities and to retrieve data dynamically.
- Developed a module for proof of investment for financial year tax deductions.

RAPID ATS - ATS Application   **January 2024 - April 2025**

ATS Application is being designed and developed on the basis of the onboarding of candidates and the recruitment which is being done through several stages by the HR team.

Responsibilities & Contributions

- Developed a module named as Talent Pool in which the employees or the candidates can be onboarded into the organization through the particular phase.
- Developed a Preboarding module in which the candidate will be involved from the start of the process till the candidate is being hired and he is being migrated to an employee.
- To automate all organization works such as candidate data collection management which has increased efficiency.
- Automate offer letter generation to the candidates dynamically through mail notifications.
- Enhancing additional features to the applications based on the requirements which are being provided.

ERADA (Client Application)   **December 2024 - April 2025**

- Designed and developed Work outside office premises module to track the employee outside office hours requests and the approvals.
- Push and inline notifications for all the requests and the approvals.

OneVision Agency Application   **August 2020 - February 2022**

OneVisionAgency (OVA) Application is being designed and developed for the easy way of access to the customers and the export and import shipments which are carried down by the outside parties and vendors and the members who are involved in the entire shipment process on a day to day basis.

Roles and Responsibilities:

- Developed SSRS and SSIS Reports for the invoices done by the customer which should be produced at the delivery of the shipment which has been done for the products.
- Optimized data performance for the customers through the reports which they are accessed.
- Issues which are raised by the customer on the priority basis has been handled efficiently and provided the exact solutions to the customers with proper derivation and without any delay to avoid complications in the business timings.

Declaration

I do hereby declare that the details furnished above are true and correct to the best of my knowledge and belief.
